

May 22, 2020

Dear Representative,

Thank you for the work you are undertaking to support communities throughout the Commonwealth respond to the impacts of COVID-19. During these times, we are all focused on the public health crisis and its impacts on our communities. We are fortunate for your leadership.

We are also grateful for the work the legislature has taken on to respond to the climate crisis. We are ready to partner with you to move important legislation forward to be signed into law, beginning with the 2050 Roadmap bill (H.3983) that you had graciously sponsored.

The 2050 Roadmap bill establishes the framework for the Commonwealth's response to the climate crisis by adopting the science-based goal of net-zero greenhouse gas emissions by mid-century to prevent the worst impacts of climate change. It incorporates a robust planning and oversight process that assures the new target is met while maintaining a thriving economy through a people-centered plan.

We are excited by the opportunity to advance important climate crisis legislation. We look forward to working with you through the close of the session.
